

	Relating first-order monadic omega-logic, propositional linear-time temporal logic, propositional generalized definitional reflection logic and propositional infinitary logic
	Journal of Logic and Computation 27 (7), pp. 2271-2301, Oxford University Press, 2017.
	Norihiro Kamide
	The relationship among first-order monadic omega-logic (MOL), propositional (until-free) linear-time temporal logic (LTL), propositional generalized definitional reflection logic (GDRL) and propositional infinitary logic (IL) is clarified via embedding theorems.
