関連画像	 <p>The diagram illustrates a sensor-based navigation system. A person is shown lying on their back with a sensor attached to their right leg. An arrow labeled 'センサーを装着' (Wearing the sensor) points to the sensor. Another arrow labeled '運動データを送信' (Transmitting motion data) points from the sensor to a smartphone. The smartphone screen displays a navigation app with a red flag icon. A callout bubble says 'センサーから取得した角度に応じて動く。' (Moving according to the angle obtained from the sensor). Another callout bubble says '誤った姿勢だと注意が出る。' (Warning appears for incorrect posture). A final callout bubble says '旗に触れると、終了する。' (Ends when the flag is touched).</p>
