

/ /	Invited Lecture at Universitas Katolik Indonesia Atma Jaya
	【海外大学招待講演】 Computer Vision
	Masayuki Arai
	First I'd like to talk about an overview and current topics of computer vision. Second, introduce our recent study on computer vision, such as textbook page recognition for self-study in distance learning and pedestrian detection.
	 A group photograph of approximately 25 people, likely students and the lecturer, posed in a classroom. They are arranged in several rows, with some sitting at desks and others standing. In the background, there is a whiteboard displaying a grid of small images, possibly related to computer vision research. The room has a simple, functional appearance with a window on the left and a door on the right.
